

2 WAYS TO UPLOAD YOUR PHOTOS

# We Make It Easy!

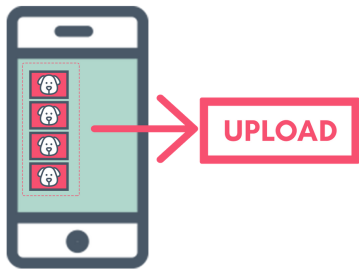

FOLLOW OUR STEP-BY-STEP GUIDE:

## Option 1 - Central Folder

This is the preferred method when you are gathering photos from multiple devices/sources.

- 1) Create a centralized folder on your computer for the photos or video you want to use.
- 2) Collect the desired photos from your different devices and locations (think Facebook, Instagram).
- 3) Now name each photo or video clip with a number "1", "2", "3" etc...creating the order in which the photos will appear in your video.
- 4) Once they are numbered, click 'Upload Folder' and you're done!

## Option 2 - Direct Upload

This option is best for those who store all their cherished pet photos on one device.

- 1) On the order form, click 'add files,' and you will have access to upload any photo/video clip from your device or social media account you desire.
- 2) Choose the photo/videos that you want.  
The order of your content will be based off the order you chose to upload them.
- 3) Then click 'upload' and you're done!
